

FERRONIQUE MAY

FULL-STACK DEVELOPER

ABOUT ME

I write. I solve. I code,

As an innovative artist at heart, I plan to change the world with one smart application at a time.

Having spent years doing jobs that left me feeling stagnant, I realised how much I enjoy a challenge and how much the idea of continuous growth excites me. This is exactly what lead me to pursuing a career in tech.

I specifically chose programming because I love creating things. Whether it be a fantasy world on paper or an application that will make the life of someone that much better, I love being behind the creation .

As a resilient and diligent individual, I want to continue growing in all aspects of my life.
